

MARTÍN COSIMANO

Software Developer

SUMMARY

As a full-stack software developer from Argentina, I began my tech journey during the pandemic. My training program, entirely taught in English, had a strong emphasis on Object-Oriented Programming (OOP) and specifically focused on web development. Through this program, I gained expertise in a variety of technologies, including HTML, CSS, JavaScript, React, Node.js, Express.js, and MongoDB, as well as front-end frameworks like Bootstrap and Tailwind.

I have gained one year of remote work experience at a Los Angeles agency where I collaborated with a team of developers to build modern, responsive web applications using industry best practices. During this time, I also applied agile methodologies such as SCRUM for project management, ensuring efficient and effective development practices.

I place a high value on continuous growth and learning to constantly seek opportunities to expand my knowledge and acquire new skills. In my next career opportunity, I am looking for a role that prioritizes ongoing professional development and encourages collaboration and knowledge sharing with experienced colleagues. I am also interested in working on projects that allow me to utilize my existing skills while exploring and learning new technologies.

WORK EXPERIENCE

Software Developer at 100Devs, Los Angeles, CA - Remote

March 2022 — April 2023

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Sound Up (Fullstack Web App) – Social network that connects music enthusiasts worldwide, allowing them to share their favorite songs and interact with each other. With a vast selection of music powered by the Spotify API, Sound Up is an immersive and interactive platform that features a range of social functionalities, such as creating posts, liking, and commenting on content, enabling users to engage with each other and build a community around music.

Breaking Waves E-commerce – Clean and intuitive e-commerce website. It offers diverse urban products such as skateboards, clothes, and accessories, with standard features like a shopping cart.

Animated Avatar Generator (Fullstack Web App) – Allows users to create animated avatars based on text input and provides a user-friendly platform for customization. Users can save their favorite avatars to a list using the "heart" button and can also discover popular and highly-rated characters with the "like" button.

Other Projects: Ice Cream Kingdom Website, WarcraftStatistics, On-demand background color changer for Partnered Twitch streamer, and many more.
